

Powerful exudate management has a new home at BSN medical

sorbion
health needs care

BSNmedical

BSN medical are proud to have acquired sorbion, a specialised technology company that focuses on products that treat chronic wounds, and the makers of sorbion dressings.

Launched just over 5 years ago the sorbion range of dressings, which include sorbion sachet extra, sorbion sachet xl, sorbion sachet multistar, sorbion sachet border, sorbion contact and sorbion sana gentle, have become firm and trusted favourites in the super-absorbent wound dressings area and are amongst the market leaders.

With a myriad of exudate management products on the market it can be a challenge finding the right product to use and the news that your favourite brand has been bought by another wound care company may fill you with concerns that the product will be changing.

The sorbion dressing range will still be manufactured by the same company, the only change will be that the dressing supply will now come through BSN medical, rather than H&R Healthcare, so you can be reassured that you will still be receiving exactly the same, trusted dressings.

BSN medical is one of the world's leading medical device companies, which operates globally in 30 international destinations. It is passionate about wound care, with a heritage going back over 100 years and is already well known in the wound care and vascular therapies field with brands like Cutimed® and JOBST®.

Under its care, the sorbion range of dressings will be able reach a wider audience to enhance healthcare professionals choice and patient care. BSN medical's heritage and experience, combined with sorbion's innovation potential is also very exciting for the development of future advances in wound care.

Dr Felix Dahm, Executive Vice President of Innovation and Strategic Development at BSN medical, commented: "Innovation is a core element of our strategy in wound care and vascular therapies. We will benefit substantially from the extended access to state-of-the-art superabsorbent technologies and the knowledge base that comes with the integration of sorbion. The sorbion team will become an important part of our centre of excellence for wound care and bioscience research and development."

If you would like any further information on sorbion or BSN medical's Wound Care portfolio please contact BSN medical's Customer Service Team on 0845 122 3600, pressing option 1 or visit www.bsnmedical.co.uk. **WUK**
